## *Bathroom Bliss*

By: Evelyn Eshun

As a Designer I am faced daily with the challenge of creating and executing interiors which increase the standard of living, functionality and investment value of my Client's homes. The various projects which come to EEID include Renovating as well as Decorating projects. One of the most popular requests from Clients is for us to transform a tired and dated bathroom into a luxurious spa getaway.

The bathroom is a space which greets you in the morning and bids you good night at the end of the day, it must make you feel safe, comfortable and inspired. A multitude of new technological advancements available for the modern bathroom allow us to bring luxury to the most modest of bathroom renovations.

Our Clients are expressing that they want all the comforts of a local spa in their private residence. We often include features such as heated floors, linear drains, led lighting, sound systems and steam showers into many of our renovation projects. The new standard for showers is to have frameless glass with a door which swings both ways, a rain-head shower, jets and a bench seat for comfort and safety.

Added touches such as custom vanities created especially for the Client's need, mirrors carefully custom fitted to expand and brighten the space and gorgeous plumbing fixtures which highlight the aesthetic expression of the homeowner, compound to create the perfect luxurious escape within the home.

With each project, the goal is to successfully create spaces for Clients who wish to re-invent themselves through their interiors. It is always a pleasure to work with clients who are eager for a complete change in their home environment. At EEID we provide complete interior design services including planning, sourcing, renovating, decorating and management.
